Bromcom

Bromcom in Primary Schools

Bromcom's Management Information System (MIS) software for Primary Schools is purpose built to manage data relating to the running of your school.

Bromcom manages school administration from A to Z with its complementary range of modules catering for all your needs. Not only is everything 'under one roof' but each product has been created to ensure maximum efficiency via an intuitive and consistent interface.

The Simplicity of the Bromcom MIS - The Bromcom Team know and understand just how hectic a school day can be, therefore it is crucial that your Management Information System (MIS) helps to smooth processes. The Bromcom MIS has been designed and created by educationalists to ensure that it is effective and easy to use, giving you the time to focus on providing pupils with the best education possible.

Bromcom does not restrict you to using one input device; you can mix and match according to your needs. For example, P.E staff might find it convenient to take pupil attendance using an iPhones or smart phone. Equally, IT staff can use their desktop computer, iPad or laptop.

Secure Data

Data security is of utmost importance to us, therefore we do not ask you to open SQL ports to the curriculum network unlike other alternative MIS products.

No need to spend hours sifting paperwork for the data you need!

All pupil information as well as teacher information is at your fingertips. Administrative staff no longer need to spend hours searching for data and for analysing data manually – the Bromcom MIS does it all for you!

High maintenance?

The Bromcom MIS is installed centrally, there's no administration worries and zero client installation.

The UK's first and only all-browser based MIS system

Bromcom offers low cost management and low cost ownership. Intuitive browser familiarity means minimal training for staff.

Bromcom MIS Modules

Manage...	Plan...	Monitor...	Reporting...
e-Administration	e-Timetable	e-Registration	e-Reporting (Ad-hoc)
e-Messaging	e-Curriculum	e-Behaviour	e-Analysis (Graphical analysis)
e-Cover	e-Options	e-Contact	e-Census
e-Exams		e-Assessment	

Operating at a level above the MIS are the Bromcom Galaxy modules:

Teacher's WebFolder provides browser-based access to the MIS, enabling teachers to enter and review data from within the classroom, at home, or anywhere with an internet connection. Being browser-based means there is no client installation, and the system can be accessed on any platform, via a range of devices (PCs, laptops, iPhones etc.)

MyChildAtSchool is a user-friendly online portal for parents to access their child's school data, including real-time attendance reporting, assessment and behaviour.

The **Bromcom VLE** is a collection of essential teaching and learning aids for pupils and teachers, delivered via a secure web portal. Staff create Lesson Plans, Assignments and Quizzes for pupils to complete online.

Full details of all our MIS components can be found on our website at www.bromcom.com/mis

Remote accessibility

Staff may be given access to the Bromcom MIS, notably the registration package Teacher's WebFolder, from anywhere they have internet access.

This means that staff are not required to stay in school to input pupil grades etc, they can do it from home.

The Bromcom Difference

Automate and simplify administrative tasks from start to finish. Prepare for the school academic year with e-Curriculum and e-Timetable. Help ensure academic success for pupils by monitoring attendance, behaviour and grades. Parents can access this information whenever they want via the MyChildAtSchool parent portal.

Peace of mind

Bromcom Support is renowned as being the best in the industry. We carefully select our Helpdesk Agents as well as our engineers who are always readily available. Our Helpdesk Team is a phone call away, and should they be unable to resolve your issue remotely we will send an engineer onsite.

Report writing in a flash!

Writing pupil reports is so much easier with the Bromcom MIS because all the data is readily available and easily accessible to authorised personnel. Ideal for Parents Evenings, staff are able to show parents their child's performance statistics.

Case Study: Cotgrave Candleby Lane School Bromcom MIS

Cotgrave Candleby Lane School is a Primary School in Nottinghamshire. Situated in a state of the art 'extended school' facility, the school uses the Bromcom MIS to assist them in their drive to offer all children every opportunity to maximise potential in the classroom and beyond. In their words, "No target unreachable!"

IT Manager Jayne Elston and teacher Tony Warsop explained some of the benefits of using the Bromcom system.

So why Bromcom?

"It's so easy to use and teachers love the fact that they can have student information at a click of a button. The system is so configurable; we introduced e-Behaviour and we can configure our Behaviour Policy into Bromcom."

"This is our second year with Bromcom. We use Attendance, Admin, Behaviour and Teacher's WebFolder which the teachers love. Being a Primary School we only use AM/PM registers."

How does Bromcom implement upgrades to the system?

"New updates are very useful and worth having. Bromcom always informs us first and carries out upgrades at a suitable time, e.g. after school, so as not to interrupt the school working day"

Does Bromcom provide training and manuals?

"Yes they do. However, we have never really needed them as the Bromcom system is so intuitive. Helpdesk are also at hand if we need any quick assistance."

How was the implementation process?

"The Install and training went very well. There were a couple of small hiccups but these were resolved immediately – it is inevitable with any new system.. We get regular visits from Engineers and Trainers to check how we're getting along. All the staff at Bromcom are always very helpful and extremely knowledgeable in all aspects of the Bromcom system."

And if you had to rate Bromcom out of 10?

"9 plus"
