Bromcom

BVLE - The fully integrated Virtual Learning Environment

What is the Bromcom VLE?

Bromcom's VLE is a collection of essential teaching supports for pupils and teachers via a secure web portal. Staff can create Lesson Plans, Assignments and Quizzes for pupils to complete online. The Bromcom VLE interface has been designed to be user friendly and intuitive to use for both teachers and pupils.

Forums with threaded discussions can be created, facilitating and encouraging collaboration and communication between pupils and teachers through greater interaction. Course information such as past exam papers and timetables can all also be readily accessed within the VLE.

Key Features

- Prepare structured lesson plans for classes or individual students
- Quickly and easily create quizzes and assessments, with the facility to enhance them with rich media content (images, audio, video etc.) as well as links to supporting websites, files and documents
- Easily produce multiple-choice or 'fill in the blanks' questions with customisable automated scoring and feedback to pupils
- Produce, import and share lesson materials
- Pupils can access and complete their homework and assessments online from anywhere that has internet access
- Access to uploaded course material and other information such as syllabus and course content

Lesson Plans

The Lesson Plan Module is where a teacher can create a step-by-step plan for pupils to follow. The teacher can add an introductory section to the subject and a summary of the course content. Quizzes and Assignments such as essay questions can be set here following particular lessons, with the teacher able to include a wide range of attachments and weblinks as additional material. The 'Prerequisite' option assists teachers in creating a required path for the Lesson Plan. All of the sections can be placed in a desired order for the students to follow to complete the tasks set.

Assignments

Using the Assignment Module, teachers can set various assignments for pupils to complete. Material to assist pupils and enhance the assignment can be added in the form of attaching documents, links, videos, images etc.

Quizzes

Teachers can set quizzes for pupils to complete online via their own BVLE login account. The quiz can be completed at school or at home – depending on the teacher's preference. Questions can be formed as multiple choice or "fill in the blanks". The teacher can also add multimedia to the questions. The pupil is able to immediately receive feedback to their answers as the teacher can define responses to each question depending on the pupil's given answer.

Spaces

This is where teachers and pupils can create their own "blog" style content. Linked in with classes or individuals with the facility for including multimedia files for pupils to access online. Forums can also be linked with threaded discussions for discussion, support and debate.

Classes

Teachers and students can view their classes with a percentage attendance figure shown alongside. It also shows how many Lesson Plans, Quizzes and Assignments are in place for each of these classes, and by clicking on any class the teacher/student will be taken to the Space Module section for that particular class.

Timetable

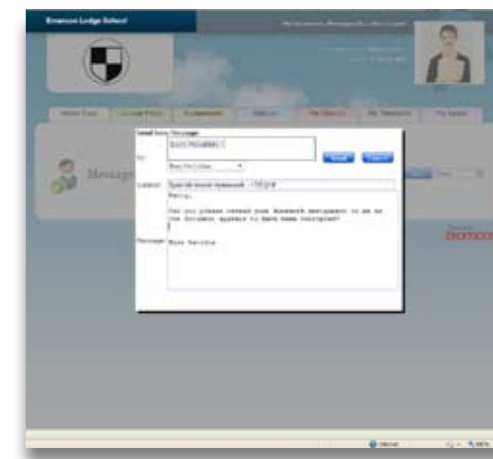

Both Teachers and pupils can access their timetables to see what is scheduled for the week. Configurable to allow you to select which dates are displayed.

Links

Teachers can add external links such as to online journals, educational websites and other relevant, useful resources for students to access while studying. This complements the teaching material while encouraging pupils to expand on their research.

Messaging

Staff and pupils can send and receive messages. Teacher's can send messages direct to individual pupils, handpick a selection of contacts or add recipients by classes. Messages are stored within the BVLE and can be monitored by staff with the appropriate level of administrator access.

Forums

Forums can be created specifically for particular groups, subjects and classes. Pupils are encouraged to interact and join in discussions, asking questions as well as collaborating with their classmates. Class specific threads can cover material from the previous and upcoming lessons, general forums can cover broader subjects or information specific to, for example, the school or local area.

What makes the Bromcom VLE so fantastic?

The Bromcom VLE is an excellent method of classifying digital content, map it with the curriculum and reuse it over and over again. Staff are no longer required to spend hours at the photocopier, everything is stored within the VLE from assessments to quizzes to classwork

The VLE has been designed and constructed with the end-users in mind to provide an intuitive and user-friendly package ensuring maximum ease of use.

Bromcom Galaxy Product Suite

The fully integrated student data management product suite

When you combine **MyChildAtSchool** with its sister product **Teacher's WebFolder** you'll cover your school's complete requirement for Teacher and Parental access to essential pupil information.

Teacher's WebFolder is a cross platform, browser based product, designed for teachers on the move for access to *any information, anywhere* and at *any time*. Staff can register and monitor their class grades, attendance, behaviour and more from an intuitive and user-friendly interface.

The **Bromcom VLE** provides a collection of essential teaching supports for pupils and teachers via a secure web portal. Staff create lesson plans, assignments and quizzes online, all with the option for incorporating multimedia content. The Bromcom VLE operates as a layer above your MIS making relevant information available to verified users.

All three modules in the Bromcom Galaxy suite work individually as stand alone products, or combined to provide a comprehensive, fully integrated solution for entering, accessing and analysing pupil data.
