

## Bromcom MIS

5.8% 50.8% 65.2% 72.5% 83.3% 85.3% 70.0% 76.8% 91.0% 55.0%

**Bromcom's Management Information System (MIS)** software for Secondary and Primary Schools is purpose built to manage school data relating to students, curriculum, resources and more.

The Bromcom MIS provides capabilities for entering test and assessment scores, building timetables, tracking attendance and managing many other student-related data needs in a school.

Installations vary in size and scope. From packages implemented in relatively small organizations for covering student records, to enterprise-wide solutions that cover a broad range of aspects of running multi-site split schools.

The Bromcom MIS can be scaled to different levels of functionality by the addition of modules which can be configured to meet specific requirements.

**The Simplicity of the Bromcom MIS** - We know how hectic a school day is for teachers and administrative staff. The role of technology should be to streamline processes rather than as an additional burden. We have a full MIS which is simple to use, enabling you to get on with your daily tasks.

Now is the right time to change because finally there is an MIS which has been created by you - with your input and feedback, which is simple to implement and even simpler to use!

### **The UK's first and only all-browser based MIS system**

Bromcom offers low cost management and low cost ownership. Intuitive browser familiarity means minimal training for staff.

**High maintenance?** The Bromcom MIS is installed centrally, with zero client installation.

**Remote accessibility** Via the internet, teachers as well as parents can access the Bromcom system from home.

*"As relative newcomers to the full Bromcom MIS we can see how powerful the product already is and really look forward to it enhancing the provision of education at our school."*

*"The quality and training that has been provided for the different modules has been of a high standard and delivered by members of the Bromcom team who are specialists in the different modules. The level and quality of telephone support has exceeded our expectations and we would suggest that it is unlikely to be matched by companies offering similar products. In addition, the swift response in terms of 'quick fixes' has been exemplary."*

**The Bromcom Team at Thorpe St Andrew School, Norwich**

## Bromcom MIS Modules

Manage...	Plan...	Monitor...	Reporting...
e-Administration	e-Timetable	e-Registration	e-Reporting (Ad-hoc)
e-Messaging	e-Curriculum	e-Behaviour	e-Analysis (Graphical analysis)
e-Cover	e-Options	e-Contact	e-Census
e-Exams		e-Assessment	

### Operating at a level above the MIS are the Bromcom Galaxy modules:

**Teacher's WebFolder** provides browser-based access to the MIS, enabling teachers to enter and review data from within the classroom, at home, or anywhere with an internet connection. Being browser-based means there is no client installation, and the system can be accessed on any platform, via a range of devices (PCs, laptops, iPhones etc.)

**MyChildAtSchool** is a user-friendly online portal for parents to access their child's school data, including real-time attendance reporting, assessment and behaviour.

The **Bromcom VLE** is a collection of essential teaching and learning aids for pupils and teachers, delivered via a secure web portal. Staff create Lesson Plans, Assignments and Quizzes for pupils to complete online.

*Full details of all our MIS components can be found on our website at [www.bromcom.com/mis](http://www.bromcom.com/mis)*

### The Bromcom Difference

Automate and simplify administrative tasks from start to finish. Prepare for the school academic year with e-Curriculum and e-Timetable. Help ensure academic success for pupils by monitoring attendance, behaviour and grades. Parents can access this information whenever they want via the MyChildAtSchool parent portal.

### Tried & Tested Solution

Our software house has worked meticulously with development partner schools to be certain that all schools requirements have been met at each point. The full MIS has been in use in very large and challenging schools and is available to rollout to all schools right now! Installation is quick and simple because we want you to be using the system as soon as possible!

### Quick, simple, controllable access to the information

Open a student record in e-Administration and all the key data is immediately available. All the key information is displayed in one place – no scrolling and no switching from tab to tab. If you need more details, simply clicking on the icon will expand the relevant panel. It couldn't be simpler, but the approach is unique to Bromcom.

Bromcom manages school administration from A to Z with its complementary range of modules catering for all your needs. Not only is everything 'under one roof' but each product has been created to ensure maximum efficiency via an intuitive and consistent interface.

# What schools are saying...

## Why schools should opt for the Bromcom MIS

**Mr. Staniforth, Director of Attendance & Behaviour, Ashby School**

- You will get teacher support and enthusiasm because the system is so user friendly
- I have not met a member of staff yet who I couldn't train in the teacher interface within thirty minutes
- Parents will receive information they have never received before and it will enable the schools to develop partnerships that are essential in modern education
- The systems are very flexible and will allow different schools to adapt them to suit their particular circumstances
- The core information for a school to run and develop is accessible anytime, anywhere
- Support is outstanding and you would be working with a company that listens to its stake holders and does act to develop and improve all the time
- The interface that teachers use is fast, has very easy access being web based and provides all stake holders with all the information they could need

## Greater Functionality at Thorpe St. Andrew

**Mr Bayliss, IT Manager**

Thorpe St. Andrew in Norwich with 1,700 students, were not entirely happy with the MIS they had in place. As it was coming to the end of its life they decided to investigate what other systems were on the market. They wanted to have an online system with greater pupil information available than their existing MIS as well as a system that allowed parental access from home.

Although the Local Authority recommended upgrading their existing Phoenix system to Pearson e1, Thorpe St. Andrew was not confident with the functionality available. They reviewed the main MIS providers including Serco and SIMS but concluded that Bromcom offered a better package overall which not only offered greater functionality but was also more intuitive and user-friendly.

Bromcom's excellent record of reliable Customer Support, both remotely and on-site, was also crucial in the decision by Mr. Bayliss, the IT Manager at the school, to opt for the Bromcom system.

## Flexibility at King Edward VI Grammar School

**Mr Johnson, Assistant Headteacher**

*"We have just switched to using the Bromcom MIS in the last few weeks and we have already been very impressed with it. There is an incredible amount of flexibility and configurable options enabling us to use the system just as we want to use it. The support and training that we have received so far has been superb – I have never been kept waiting on the phone when asking for help."*
