

The U.K's No. 1 e-Registration and e-Management Systems

Bromcom

...giving you time to teach

**e-School^{ASP}
ASP Solutions**

**...all the benefits of the Bromcom solution
hosted by your Local Education Authority**

Bromcom - the choice for Electronic Registration

e-School^{ASP}

This solution offers you all the benefits of the Bromcom system hosted by your Local Education Authority (or by Bromcom, if appropriate).

What is an ASP Solution?

ASP = Application Service Provider

With an ASP Solution data is centralised at a central server or "server farm" and access is made available over high-speed broadband links.

With this option, therefore, Bromcom e-School^{4G} would be located on a central server at the LEA with the schools having access via a high-speed link.

This allows schools to undertake lesson registration in the same way as they would if they had e-School^{4G} installed on a dedicated server within the school. With the ASP Solution, however, the day to day management of the system is devolved to the LEA (or Bromcom depending on the chosen server location)

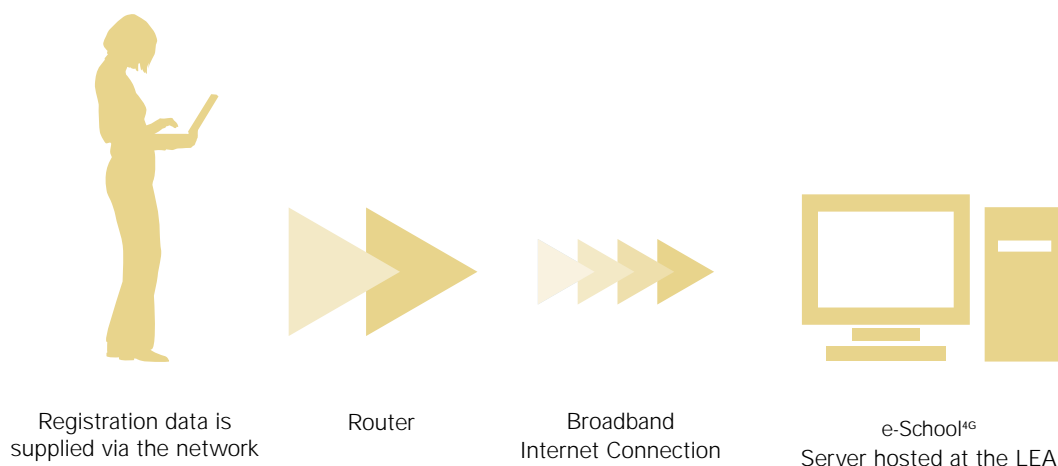

This means that schools can focus on utilising the functionality of e-School^{4G} to monitor attendance and take action to resolve issues quickly.

What are the advantages of e-School^{ASP} ?

- It is a cost effective solution because all school attendance and registration data is held at one central point
- Technical support and maintenance can be centrally managed within the LEA
- Schools can handover technical and backup responsibility to the LEA and concentrate on tackling attendance issues
- Reduced workload on teachers giving them more time to teach
- Any required upgrades are centrally coordinated
- Shared resources mean the potential for additional IT infrastructure funds for schools within the local authority

e-School^{ASP} with e-School^{4G}

e-School^{4G} is the system we offer when you opt for our ASP Solution. e-School^{4G} is our 4th generation Attendance and Registration product and is unique in the market place because it is browser based. This means with access rights staff can access attendance information from any networked workstation within the school.

About e-School^{4G}

e-School^{4G} offers the widest range of functionality and automated report scheduling of any Attendance and Registration system currently available.

- Browser based
- Built using advanced .NET technology
- Developed around an SQL database
- Advanced automated reporting capabilities

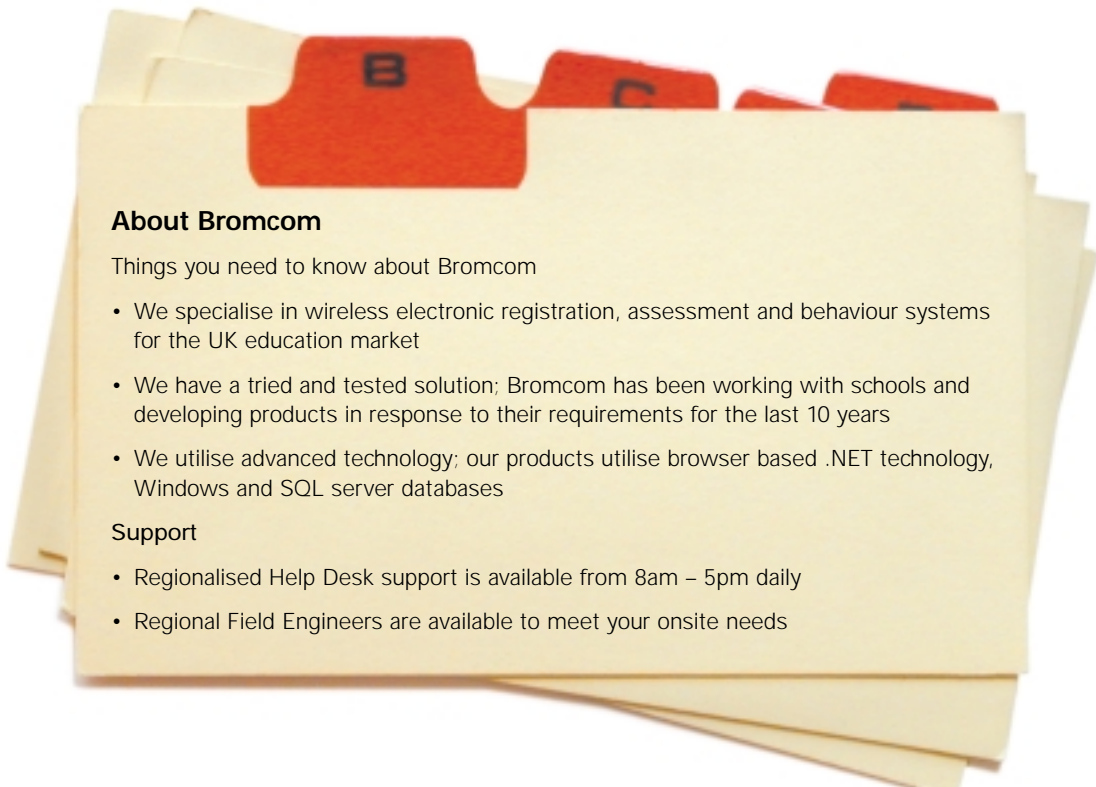

Attendance reports can be scheduled to be generated at a time predefined by you and in the output format that you require, for example by email.

- e-School^{4G} can be enhanced by the addition of Electronic Grade Book, Positive Discipline, e-Contact and other modules

These are solutions that have been proven to streamline the reporting of assessment data and the recording of behaviour information respectively.

- e-School^{4G} is fully compatible with all school MIS systems

About Bromcom

Things you need to know about Bromcom

- We specialise in wireless electronic registration, assessment and behaviour systems for the UK education market
- We have a tried and tested solution; Bromcom has been working with schools and developing products in response to their requirements for the last 10 years
- We utilise advanced technology; our products utilise browser based .NET technology, Windows and SQL server databases

Support

- Regionalised Help Desk support is available from 8am – 5pm daily
- Regional Field Engineers are available to meet your onsite needs
